

AutoID - IAA Notes

Jordan Freely

October 2025

1 General Guidelines

1. Only annotate text that relates directly to the advertised vehicles

With only one previous owner and low mileage of just 17,806 miles, this 2022 **Volkswagen** **MAKE** Polo 1.0L TSI Style is a smart choice. As a Volkswagen manufacturer-approved vehicle, this Polo Style includes

Figure 1: Example of a make label annotated. Note the first 'Volkswagen' is annotated as it refers to the vehicle, whereas the second is not annotated, as it refers to the manufacturer itself

peace of mind and a thrilling driving experience. This **CUPRA** **MAKE** manufacturer-approved vehicle meets Euro 6 emission standards and

Figure 2: Similar example, but this time annotated, as the text refers to the vehicle itself

2. Annotate labels as they appear in text, not according to the specification table

With only 35836 miles on the clock, this 2018 BMW 2 Series Active Tourer **220d Luxury** **TRIM** is a rare find. Boasting a 2.0L diesel engine

Figure 3: Example of hallucination in text. Trim is put as 220d Luxury in text, but in specification it is just Luxury trim level (see next figure)

Spec	Value
Make	BMW
Model	2 Series Active Tourer
Year	2018
Trim	Luxury

Figure 4: Specification table for hallucinated advertisement in figure 3

3. If entities of the same label are adjacent, annotate them as separate entities, unless they refer to the same detail

Some of the text contains hallucinations or errors, one of the aims of this work is be able to identify them. Therefore annotate entities as they appear in text even if it differs from the fact table

reliable workhorse ready to support your business needs. As a **2.2**
ENGINE_SPEC **TDCi** **ENGINE_SPEC** 350 **ECOnetic** **ENGINE_SPEC** FWD L3 H2

Figure 5: Example of splitting entities. Engine specs are adjacent but refer to different things so are annotated separately

4. Only label specific details, not descriptions of the vehicles that could fall into labels

With its Euro 6 emission class, this Fiesta is kinder to the environment
, and its low CO2 emissions mean you'll be doing your bit for cleaner

Figure 6: Low C02 emissions does describe the engines behaviour, so could be considered an engine spec, but since this is descriptive rather than specific, it is not annotated

5. Double check annotations before accepting an annotation. Majority of mistakes were missed entities or having the wrong label selected

2 Individual Label Guidelines

2.1 Make

The make label refers to the manufacturer of the vehicle such as Ford, Vauxhall, Mazada etc. Only annotate manufactuer names if they are refering directly to the vehicle advertised, in some cases you can have '...Mazada seats...' which is refering to the seat manufactuer not the vehicle which should not be annotated

North Loop Autohaus are delighted to present another stunning low
owner **Ford** MAKE Focus 2.3 RS 5d 375 BHP finished in Frozen White
with RS Branded Recaro Front Seats with Leather Side Blue Bolster

Figure 7: Example of a make entity annotated

2.2 Model

The model label refers to the specific type of vehicle such as a Focus, Corsa, MX-5 etc. similar to the manufactuer only annotate mentions on models when it refers specifically to the vehicle advertised

owner Ford **Focus** MODEL 2.3 RS 5d 375 BHP finished in Frozen
White with RS Branded Recaro Front Seats with Leather Side Blue

Figure 8: Example of a model entity annotated

2.3 Trim

Similar to Model but more specific lower level specification of the vehicle, such as ST-Line, Design, and Sport etc. Again only annotate when trim refers specifically to the advertised vehicle.

Spec	Value
Make	BMW
Model	2 Series Active Tourer
Year	2018
Trim	Luxury

Figure 9: Example of a Trim entity annotated

Don't mix up engine specifications with the Trim of the vehicle, annotate engine specifications separately even if they appear to be part of the trim level.

2.4 Engine Specification

This label refers to any text that details the specifications of the engine such as its volume (1.6L, 2.2L etc.), cylinder count (V4, V6, 4 cylinder, etc.). If multiple engine specifications appear adjacently, annotate them separately

reliable workhorse ready to support your business needs. As a **2.2**
ENGINE_SPEC TDCi **ENGINE_SPEC** 350 **ECOnetic** **ENGINE_SPEC** FWD L3 H2

Figure 10: Example of engine spec entities annotated

2.5 Transmission

This label refers to the type of transmission used to alter the gear ratio of the vehicle i.e. Automatic or Manual. There are some cases where an abbreviation is used to refer to a specific type of transmission such as CVT (continuous variable transmission), annotate this as well as the more typical cases where it is just '...this automatic Ford...', '...comes with a manual gearbox...'

2.6 Fuel Type

This label refers to the type of fuel used to generate energy for the vehicle such as electric, petrol, or diesel. Make sure not to confuse this with an engine specification. In cases where multiple words make up the fuel type such as 'petrol-hybrid', 'Diesel plug-in hybrid', annotate all words as one entity.

modern driving experience. As an **electric** **FUEL_TYPE** vehicle, it
provides a smooth and quiet ride, perfect for city commutes and

Figure 11: Example of fuel type entity annotated

2.7 Year

Refers to the registration year of the vehicle. Make sure to annotate only the registration year and not other dated information such as '..serviced in 2022...'

With a valid MOT until November 2025, this **2021** YEAR Hyundai KONA Premium is ready for the road. This electric vehicle combines

Figure 12: Example of year entity annotated

2.8 Body Type

refers to the type of chassis the vehicle has such as a Sedan, Coupe, Panel Van etc.

2.9 Interior Colour

Refers to the colour of any interior features of the vehicle. Annotate the colour, material, and feature referred to i.e. in the text '..featuring black leather seats', annotate 'black leather seats'

2.10 Exterior Colour

Refers to the exterior colour of the vehicle. In cases where multiple colours are given annotate the entire sentence, i.e. in the text '...comes in red and white matte paint' annotate 'red and white matte', or in the text '...finished in metallic black' annotate 'metallic black'

01/04/2025, . **Black sapphire metallic** EXTERIOR_COLOUR . Leather like new. Very clean car. Mechanically the car is in perfect condition.

Figure 13: Example of a exterior colour entity annotated

2.11 Battery Range

This label refers to the range a vehicle can travel without needed to recharge it's battery. When annotating include any clauses i.e. in the text '...this vehicle can travel 300 miles on 80% battery...' annotate '300 miles on 80% battery' or in the text '...A full charge takes you up too 400 miles...' annotate 'full charge takes you up too 400 miles'

battery, providing a **maximum range of 280 miles when new** BATTERY_RANGE . This impressive range means fewer stops and more

Figure 14: Example of a battery range entity annotated

2.12 Recharge Time

This label refers to the time taken to recharge the battery of a vehicle. When annotating include any clauses i.e. in the text '...can be charged in 20 minutes to 80% at a public charger...' annotate '20 minutes to 80% charge at a public charger', or in the text '...This vehicle can be fully charged in 1 hour 20 minutes using an at home charger...' annotate 'fully charged in 1 hour 20 minutes using an at home charger'

open road. Charging at home using a **7kW charger takes**
approximately 10 hours and 16 minutes for a full charge RECHARGE_TIME

Figure 15: Example of a recharge time entity annotated

needing a quicker boost, **public charging can take the battery from**
empty to 80% in as little as 53 minutes. RECHARGE_TIME

Figure 16: Another example of a recharge time entity annotated

2.13 Battery Capacity

refers to the electric capacity of the vehicles, typically in kWh (Kilo-Watt Hours). Only annotate the actual value. For example in the text '...this electric vehicle has a battery capacity of 45.5 kWh', annotate '45.5 kWh'

The Kia Soul Explore boasts a substantial **68 kWh** BATTERY_CAPACITY
battery, providing a maximum range of 280 miles when new. This

Figure 17: Example of a battery capacity entity annotated

2.14 Number of Seats

this label refers to the amount of seats within the vehicle. Annotate just the number associated with the value, i.e. in the text '...spacious with 5 seats...', just annotate '5 seats'

2.15 Boot Size

refers to the volume of the boot or carrying capacity of the vehicle, typically given in litres, for example in the text '...1000L cargo capacity...', annotate '1000L'

economy is around 44 mpg, which means fewer trips to the pump. The cargo volume is an impressive **6100 litres** **BOOT_SIZE** , offering substantial space for all your needs.

Figure 18: Example of a boot size entity annotated
